

 **Tammuz
Family**

You dream babies, we'll make it happen!

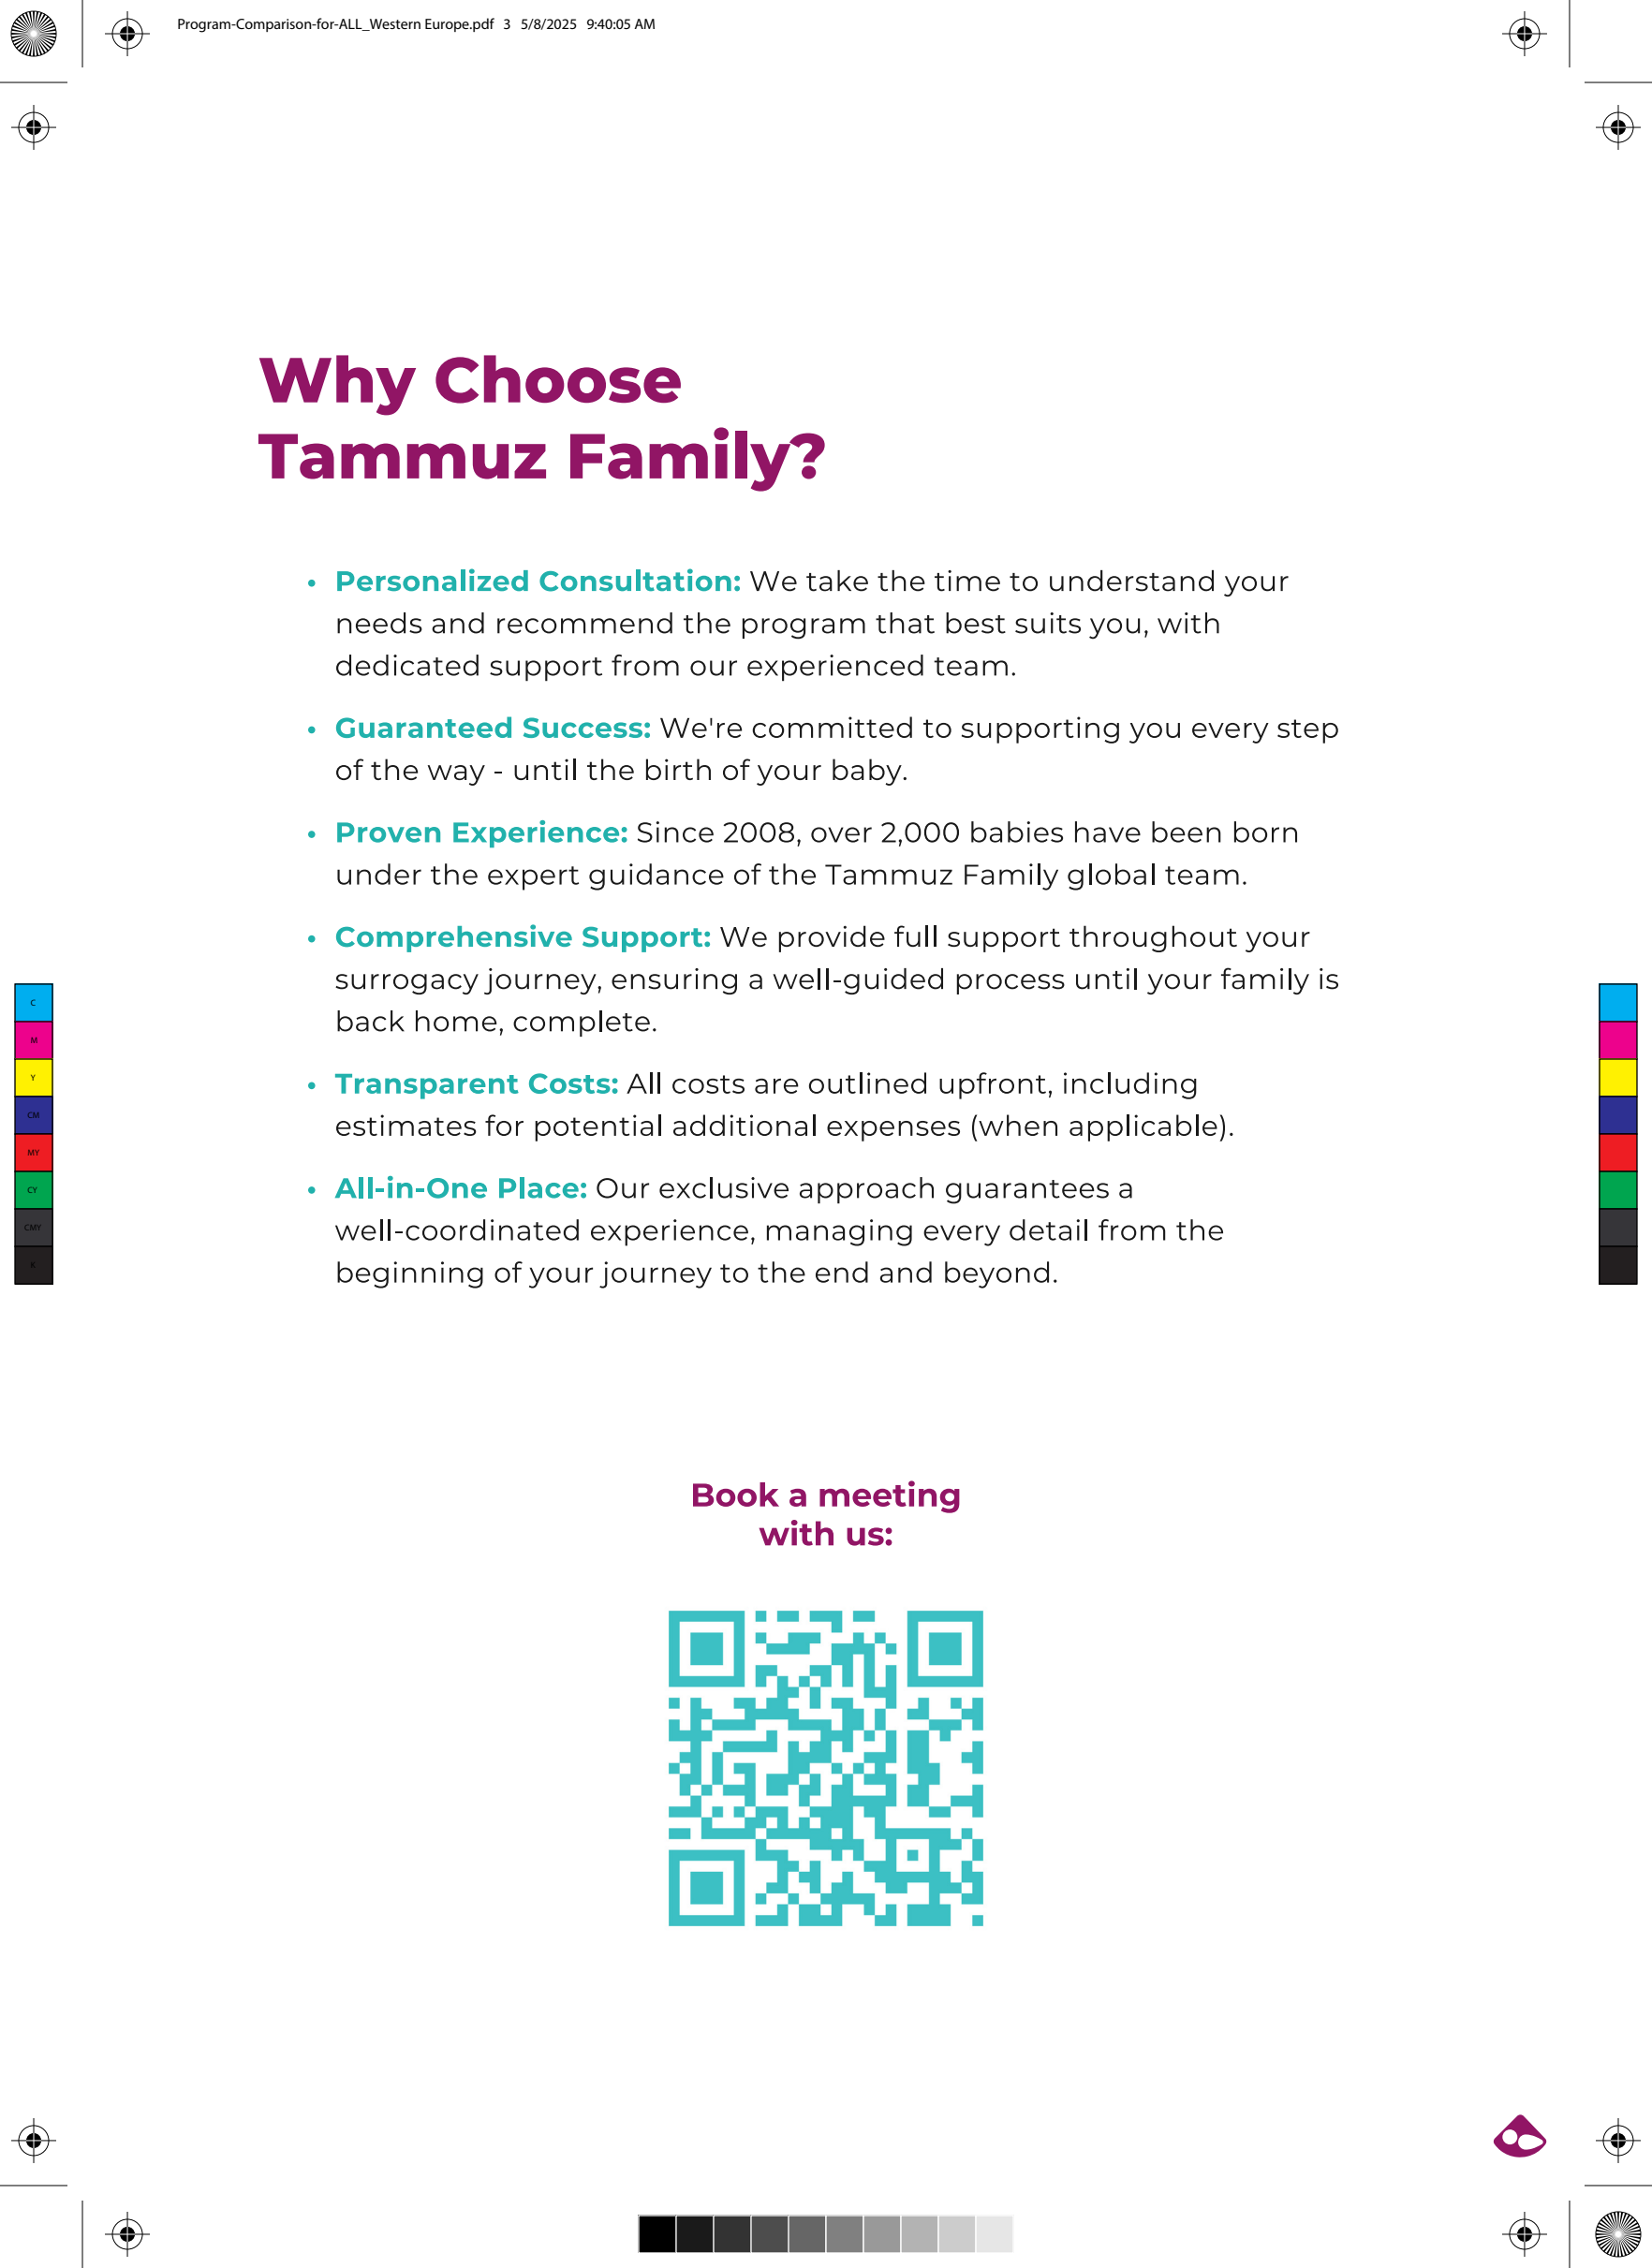

Since 2008, **Tammuz Family** has been a trusted guide for over 2,000 families worldwide - turning hopes into cherished realities. With a global presence across five continents and offices in over 15 countries, we offer personalized support at every step of the journey.

We understand that the seminar or meeting you attended today is a meaningful milestone in your path to parenthood. As you review this document, know that our commitment goes far beyond these pages.

Tammuz Family specializes in creating accessible and affordable surrogacy programs, tailored to reflect your unique vision of family.

Our dedicated team is here to answer your questions and guide you through the next steps. The dream of parenthood that brought you here today is the same dream we've helped thousands fulfill - and we would be honored to help make your dream a reality too.

Why Choose Tammuz Family?

- **Personalized Consultation:** We take the time to understand your needs and recommend the program that best suits you, with dedicated support from our experienced team.
- **Guaranteed Success:** We're committed to supporting you every step of the way - until the birth of your baby.
- **Proven Experience:** Since 2008, over 2,000 babies have been born under the expert guidance of the Tammuz Family global team.
- **Comprehensive Support:** We provide full support throughout your surrogacy journey, ensuring a well-guided process until your family is back home, complete.
- **Transparent Costs:** All costs are outlined upfront, including estimates for potential additional expenses (when applicable).
- **All-in-One Place:** Our exclusive approach guarantees a well-coordinated experience, managing every detail from the beginning of your journey to the end and beyond.

with us:

American Program

Program Requirements

- Open to all couples (heterosexual & same-sex) and single individuals
- Age limit: 60 years
- No criminal record allowed

Egg Donors

- American & South African donors
- Rigorous screening & comprehensive medical evaluations, including extended genetic testing
- Detailed profiles with extensive information & photos
- Option to be known or anonymous

Medical Process

- Egg retrieval & embryo creation typically take place in the U.S.
- PGS/CGH testing (Preimplantation chromosomal screening)
- Embryo transfer performed at a top clinic in California
- Option to transfer two embryos (one from each biological father)

Gender Guarantee

- Available for an additional fee - Cost: USD \$15,000

Surrogates

- American surrogates from across the U.S.
- Ages 21-43
- Proven healthy pregnancy and birth history
- Rigorous medical & psychological screening
- No criminal record allowed (mandatory requirement)
- Direct & personal communication with intended parents

Pregnancy Monitoring

- Fertility doctor oversees the first trimester
- Ongoing monitoring at the surrogate's local clinic
- Pregnancy protocol set by the attending physician
- Intended parents typically receive medical updates directly from the surrogate

Legal & Post-Birth Process

- Agreement signed between intended parents & surrogate with U.S. attorneys before embryo transfer
- Court order issued to establish intended parents' legal parentage at birth or shortly after
- Baby eligible for an American passport under existing regulations
- Intended parents typically stay in the U.S. for 3-4 weeks after birth to complete the baby's local documentation

Cost

- Guarantee Program (Own Embryos): From USD \$112,000
- Fertility & Guarantee Program (Donor Eggs): From USD \$148,000

Mexican Program

Program Requirements

- Open to all couples (heterosexual & same-sex) and single individuals
- Age limit: 55 years
- Age limit for using own eggs: 40 years

Egg Donors

- Exclusive Latina donor pool
- Rigorous screening & comprehensive medical evaluations, including genetic testing
- Detailed profiles with extensive information & photos
- 100% anonymous egg donation

Medical Process

- Egg retrieval & embryo creation take place at the fertility clinic
- PGS/CGH testing (Preimplantation chromosomal screening) available upon the intended parents' request
- Embryo transfer conducted at the fertility clinic
- Single embryo transfers only

Gender Guarantee

- Available for an additional fee - Cost: USD \$20,000

Surrogates

- Mexican surrogates
- Ages 21-39
- Proven healthy pregnancy & birth history
- Comprehensive medical & psychological screening
- No criminal record allowed (mandatory requirement)
- Mediated communication between intended parents & surrogate

Pregnancy Monitoring

- Monitored at ReproVida fertility clinic in Mexico City
- Follows a strict, predefined medical protocol
- Intended parents receive medical updates through Tammuz Family

Legal & Post-Birth Process

- Agreement signed between intended parents & surrogate with a local attorney before embryo transfer
- Post-birth process ensures both parents are listed on the birth certificate (for heterosexual couples) or only the biological father (for gay couples & singles), with no mention of the surrogate
- Intended parents typically stay in Mexico for about 6-8 weeks after birth to complete the baby's local documentation

Cost

- Self-Extraction Program: From USD \$74,000
- Guarantee Program (Donor Eggs): From USD \$85,000

Colombian Program

Program Requirements

- Open to single men and same-sex male couples
- Age limit: 55 years in a couple, 52 years for a single father
- No criminal record allowed

Egg Donors

- Exclusive Latina donor pool
- Rigorous screening & comprehensive medical evaluations, including genetic testing
- Detailed profiles with extensive information & photos
- 100% anonymous egg donation

Medical Process

- Egg retrieval & embryo creation take place in Colombia
- PGS/CGH testing (Preimplantation chromosomal screening)
- Embryo transfer conducted at a fertility clinic in Colombia
- Single embryo transfers only

Gender Guarantee

- Available for an additional fee - Cost: USD \$20,000

Surrogates

- Colombian surrogates
- Ages 21-39
- Proven healthy pregnancy & birth history
- Comprehensive medical & psychological screening
- No criminal record allowed (mandatory requirement)
- Mediated and direct communication with intended parents

Pregnancy Monitoring

- Monitored at the fertility clinic
- Follows a strict, predefined medical protocol
- Intended parents receive medical updates through Tammuz Family

Legal & Post-Birth Process

- Agreement signed between intended parents & surrogate with a local attorney before embryo transfer
- Initial birth certificate includes the biological parent & surrogate; the surrogate's name is later removed (usually 12-15 months after birth)
- Non-biological parents cannot be added to local documentation
- Intended parents typically stay in Colombia for about 4-6 weeks after birth to complete the baby's local documentation

Cost

- Guarantee Program (Donor Eggs): From USD \$74,500
- Double Guarantee Program (Donor Eggs): From USD \$127,500

Argentinian Program

Program Requirements

- Open to all couples (heterosexual & same-sex)
- Age limit: 55 years
- No criminal record allowed

Egg Donors

- Exclusive Latina donor pool
- Rigorous screening & comprehensive medical evaluations, including genetic testing
- Detailed profiles with extensive information & photos
- 100% anonymous egg donation

Medical Process

- Egg retrieval & embryo creation take place in Argentina
- PGS/CGH testing (Preimplantation chromosomal screening)
- Embryo transfer conducted at a fertility clinic in Argentina
- Single embryo transfer

Gender Guarantee

- Available for an additional fee - Cost: USD \$20,000

Surrogates

- Argentinian surrogates
- Ages 21-39
- Proven healthy pregnancy & birth history
- Comprehensive medical & psychological screening
- No criminal record allowed (mandatory requirement)
- Mediated and direct communication with intended parents

Pregnancy Monitoring

- Monitored at the fertility clinic
- Follows a strict, predefined medical protocol
- Intended parents receive medical updates through Tammuz Family

Legal & Post-Birth Process

- Agreement signed between intended parents & surrogate with a local attorney before embryo transfer
- Initial birth certificate includes one intended parent & surrogate
- A legal procedure is required post-birth to remove the surrogate's name and add the second intended parent (the process may take up to one year)
- Intended parents stay in Argentina for about 4-6 weeks after birth to complete the baby's local documentation

Cost

- Guarantee Program (Donor Eggs): From USD \$74,500
- Double Guarantee Program (Donor Eggs): From USD \$127,500

Armenian Program

Program Requirements

- Open to married heterosexual couples and single individuals
- Age limit: 55 years

Egg Donors

- Exclusive Russian & Georgian donor pool
- Rigorous screening & comprehensive medical evaluations, including extended genetic testing
- Detailed profiles with extensive information & photos
- Genetic matching between intended parents & selected donor available
- 100% anonymous egg donation

Medical Process

- Egg retrieval & embryo creation take place in Armenia
- Chromosomal screening (PGS/CGH) available
- Embryo transfer conducted at a fertility clinic in Armenia
- Option to transfer two embryos (subject to medical approval)

Gender Guarantee

- Available for an additional fee - Cost: USD \$20,000

Surrogates

- Non-Armenian surrogates (only from neighboring countries)
- Ages 21-42
- Proven healthy pregnancy & birth history
- Comprehensive medical & psychological screening
- No criminal record allowed (mandatory requirement)
- Mediated communication between intended parents & surrogate

Pregnancy Monitoring

- Monitored at the fertility clinic
- Follows a strict, predefined medical protocol
- Intended parents receive medical updates through Tammuz Family

Legal & Post-Birth Process

- Agreement signed between intended parents & surrogate with a local attorney before or after embryo transfer
- For heterosexual couples: Both parents are listed on the birth certificate, with no mention of the surrogate
- For single parents: Only the biological intended parent is listed on the birth certificate
- A DNA test is conducted to confirm the genetic link between the baby and the intended parent and no genetic connection to the surrogate
- Intended parents typically stay in Armenia for about 5 weeks after birth to complete the baby's local documentation

Cost

- Existing Embryos (Own Embryos): From USD \$71,000
- Guarantee Program (Donor Eggs): From USD \$81,000
- Double Guarantee Program (Donor Eggs): From USD \$140,000

Georgian Program

Program Requirements

- Open to married and unmarried heterosexual couples (at least 1 year cohabitating)
- Age limit: 60 years

Egg Donors

- Exclusive Georgian donor pool
- Rigorous screening & comprehensive medical evaluations, including extended genetic testing
- Detailed profiles with extensive information & photos
- Not anonymous (full name included in the contract, but no personal connection)

Medical Process

- Egg retrieval & embryo creation take place in Georgia
- PGS/CGH testing (Preimplantation chromosomal screening) available upon the intended parents' request
- Embryo transfer conducted at a fertility clinic in Georgia
- Option to transfer two embryos (subject to medical approval)

Gender Guarantee

- Not available

Surrogates

- Not Georgian surrogates, only women coming from neighboring countries
- Ages 21-42
- Healthy pregnancy and birth history
- Medical and psychological screening
- Criminal background check
- Mediated communication between the intended parents and the surrogate

Pregnancy Monitoring

- Monitored at the fertility clinic
- Follows a strict, predefined medical protocol
- Intended parents receive medical updates through Tammuz Family

Legal & Post-Birth Process

- An agreement is signed with the assistance of a local attorney between the intended parents, the surrogate, and the egg donor (if applicable) prior to the embryo transfer
- Post-birth process to have both parents listed on the birth certificate, with no mention of the surrogate
- Intended parents typically stay in Georgia for about 5 weeks after birth to complete the baby's local documentation

Cost

- Self-Extraction: From USD \$58,000
- Existing Embryos (Own Embryos): From USD \$55,000
- Guarantee Program (Donor Eggs): From USD \$72,000

Our beautiful families!

*That's the
power of love*

So sweet

Amazing

**We would love to have
your family as part of ours!**
