

WHY WORK WITH US?

Navigating the legal aspects of assisted reproduction requires expertise and careful attention to detail. Our team ensures that every agreement is airtight, every parentage order is secured, and every legal complexity is resolved with precision. We work closely with fertility clinics, agencies, and international legal experts to address jurisdictional differences and ensure compliance with all applicable laws. Whether you need assistance with contract negotiations, dispute resolution, or legal recognition of your parental rights, our attorneys provide proactive solutions tailored to your specific circumstances. By anticipating potential challenges before they arise, we make the process more predictable and stress-free.

Starting Your Family Journey

Starting a family through assisted reproduction is a profound journey that requires navigating important legal considerations.

Vorzimer Masserman brings decades of experience in fertility law, offering trusted legal support to intended parents as they navigate every legal aspect of their path to parenthood.

Dean E. Masserman

With over 28 years of experience in family law and complex litigation, Dean E. Masserman is a leading attorney specializing in fertility law. Dedicated to helping intended parents navigate the legal complexities of surrogacy and egg donation, he has built a reputation for precision and care.

Throughout his career, Masserman has represented clients in more than 40 jury trials, 100 court trials, and thousands of hearings. At Vorzimer Masserman, he goes beyond providing legal counsel, taking the time to understand each family's unique situation and offering personalized guidance at every stage. His approachable demeanor and commitment to excellence make him a trusted advocate for families worldwide.

Amani T. Hanson

As a partner at Vorzimer Masserman, Amani T. Hanson brings over a decade of experience in fertility and family law. Passionate about supporting intended parents, surrogates, and egg donors, she adeptly navigates the complex legal aspects of assisted reproduction.

With a background in biochemistry, she seamlessly bridges the medical and legal dimensions of fertility journeys. Highly skilled in drafting and negotiating contracts, securing pre-birth orders, and addressing cross-border legal challenges, her approach combines empathy and professionalism, ensuring a smooth and stress-free process. This dedication has made her an invaluable resource for families worldwide.

Reproductive Law

We provide expert legal support to intended parents, surrogates, and egg donors. Our services include drafting and reviewing legally binding agreements, securing parentage orders in the U.S. and internationally, assisting international families with cross-border legal matters, and coordinating communication between surrogates, donors, clinics, and trust managers.

Medical Malpractice in Reproductive Law

If medical negligence affects your family-building journey, we advocate for your rights. We handle cases involving birth injuries, procedural errors in fertility treatments, mishandling of embryos, eggs, or sperm, and violations of informed consent.

Family Law

We offer legal solutions for family-related matters, including parental rights and custody agreements, LGBTQ+ family representation through surrogacy and adoption, and assistance with divorce, property division, and family disputes. We also help clients establish prenuptial and postnuptial agreements to secure their future interests.

Business Law for Reproductive Agencies

We assist fertility clinics and reproductive agencies with business formation, contract drafting, and compliance with U.S. reproductive laws and regulations, ensuring legally sound operations.

Litigation

Legal disputes can arise during the surrogacy or family-building process. We represent clients in contract disputes related to surrogacy and egg donation, custody and visitation disagreements, and complex litigation requiring expert legal guidance.

Estate Planning for Families

Building a family through assisted reproduction comes with unique legal considerations. We help protect your family's future through wills, trusts, guardianship planning, and power of attorney and healthcare directives.
